

Custom Html Restoration

- Make sure to turn off the “Xampp” first if you have, if not then it's ok.
- If “Xampp” is on then turn it off from here .Right click on

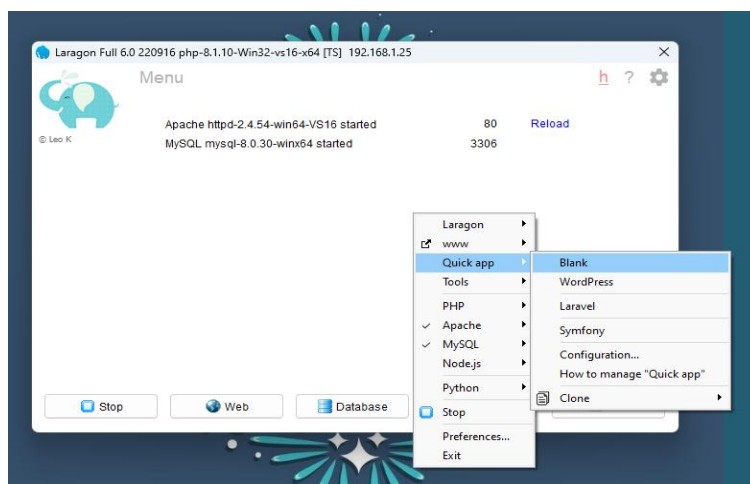

xampp and close.

- Install Laragon from this official website.

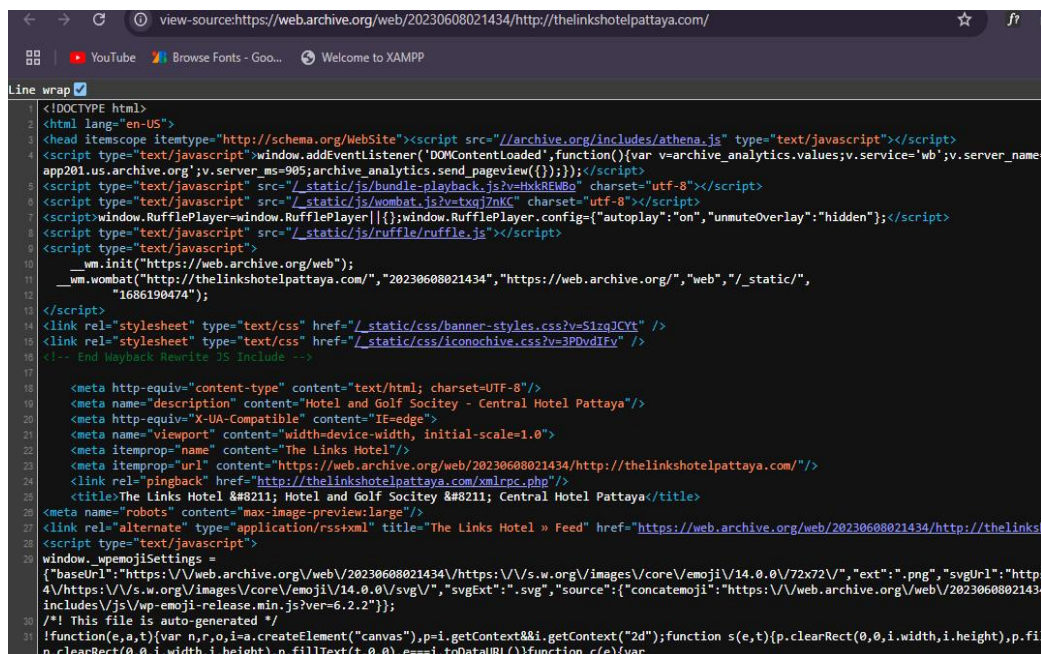

- When you downloaded laragon then you need to create the folder for HTML site in laragon.

- Right click on laragon window and click on blank and write the name of your website which you want to be restored.
- To do this custom HTML restoration open the VS code if you have not then install it first.
- The link provided to you of archive website looks like this

<http://web.archive.org/web/20130126000438/http://www.your-site-name.com/>

- Open the archive link of site in browser.
- Then press control+U .This will open the source code of current page in browser.The source code looks like this. Make sure to check mark this line wrap in top left corner of page.

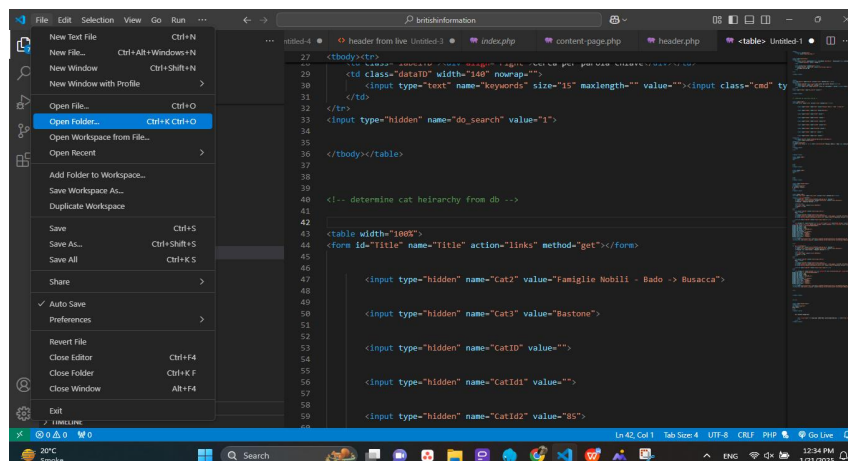

```

```

- Then remove these archive links from index.html by using search and replace.

- <https://web.archive.org>
- <http://web.archive.org>
- <//web.archive.org>
- <https://archive.org>
- <http://archive.org>

- Press ctrl+f and this kind of box will open .

- Copy the first link and paste in find then click on this replace all icon and it will replace this link with nothing.

- Then remove all the above provided archive links one by one.
- Next step is to remove these kind of links. These links are according to your site(you can copy them from your code).The links provided below are just for example.

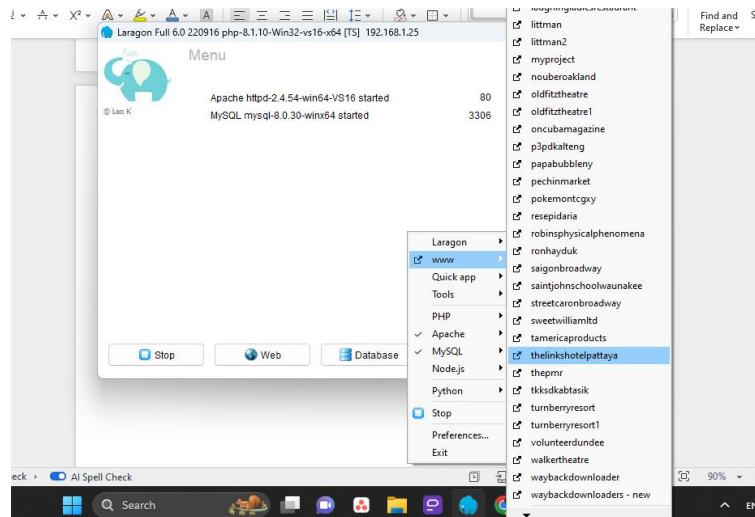

</web/20230608021434/>  
[/web/20230608021434im\\_/](/web/20230608021434im_/)  
[/web/20230608021434cs\\_/](/web/20230608021434cs_/)  
[/web/20230608021434js\\_/](/web/20230608021434js_/)  
[/web/20230608021434if\\_/](/web/20230608021434if_/)

- Next you need to remove main site links. These links are according to your site(you can copy them from your code).The links provided below are just for example.

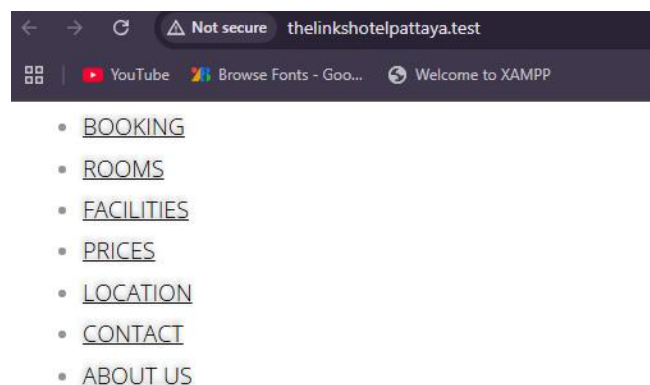

<http://thelinkshotelpattaya.com>

<https://thelinkshotelpattaya.com>  
<http://www.thelinkshotelpattaya.com>

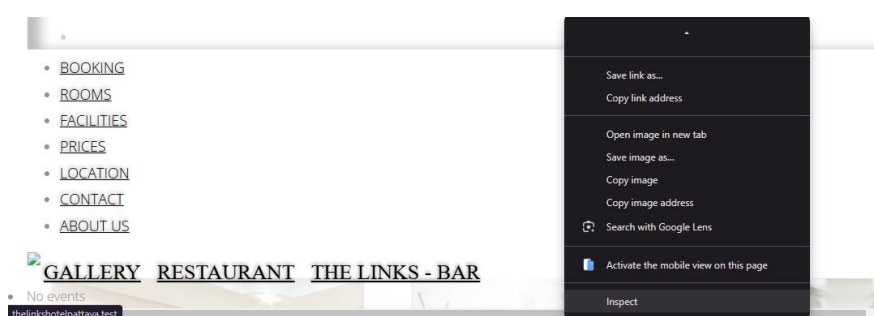

- After removing all these links . Then open your website in browser which you created in laragon.Right click on laragon window hover on www then the list of your laragon projects will open.

- Then click on your website which you want to open in browser.Your website URL looks like this .

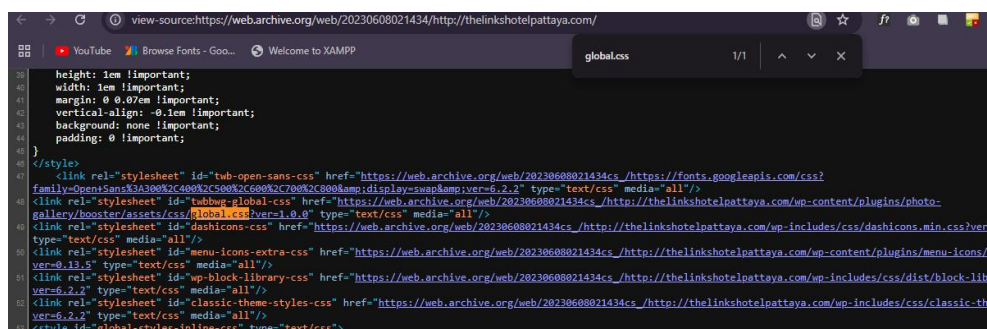

- Now you need to add the CSS , js and image files in your website folder.
- Go to your website right click and the click on inspect.

- Then click on console. And you can see names of all the missing css, js and image files.

- Copy the name of CSS files and search it in the archive source

code. Press ctrl+f and paste the name and then it shows the link of file in the source code.

- Open the link of file in the new tab.
- Press ctrl+s to download the file .
- Download file in the correct path . You can also see the path of file in the URL (in most cases you will need to create the new folders to save the file in the correct path).
- After downloading CSS files , then download the js and image files in the correct path.
- After downloading all files ,refresh the page .(now you can see the style of site looks better and same as archive if not then may be there is some file missing).
- Now you need to create all remaining pages in the correct path .
- Right click on the link and open in new tab and then create the page in the vs code by following the same method as provided for home page creation.
